

REPORT_PERSONID_427769ENCOUNTERID_9474203

Person ID : 427769

Encounter ID : 9474203

Event Title : CHEST,ROUTINE(PA/AP/LAT)

Performed on Date : 16-JUL-2007 20:14:00

MRN Number :210288

Technique: PA and lateral view of the chest with comparison study

on7/13/2007.Findings:Examination of the chest in PA and lateral projections demonstrates aworsening large right pleural effusion and likely subadjacent . Thereis also a small left pleural effusion. The cardiac and mediastinalcontours appear normal. There is no pneumothorax, consolidation orpulmonary congestion. Both hemidiaphragms are smooth and in normalposition and the bony thorax is unremarkable.

IMPRESSION:Worsening bilateral pleural effusion, right greater than left. Likelysome adjacent atelectasis associated with the right pleural effusion.
