

REPORT_PERSONID_365141ENCOUNTERID_9058445

Person ID : 365141

Encounter ID : 9058445

Event Title : CT:FACE SINUSES WITHOUT CONTRS

Performed on Date : 12-MAR-2007 11:02:00

MRN Number :197600

History: Chills. Rule out sinusitis. Technique: Thin axial sections were obtained through the facial bones with sagittal and coronal recons. No prior study available for comparison. Findings: There is no evidence of facial bone fracture or bone destruction. The orbits are normal. There is mild frontal, sphenoid, maxillary sinus mucosal thickening as well as moderate mucosal thickening in ethmoid sinuses. There are no air-fluid levels.

Impression: Multisinus mucosal thickening. No evidence of air-fluid levels.
