

Person ID : 709054

Encounter ID : 12232062

Event Title : CT CHEST W/O CONTRAST

Performed on Date : 10-AUG-2009 09:46:00

MRN Number :482548

"PLEASE BE AWARE: This exam will display along with a prior exam (if available) for comparison that may or may not be related to this exam. Thank you."

Description :

CT CHEST WITHOUT CONTRAST.HISTORY: 69-year-old male with history of left pleural effusion, followup evaluation. TECHNIQUE: Contiguous axial images were obtained from the lung apices to the bases without intravenous contrast. Study is compared with prior CT dated 7/27/2009. FINDINGS: Evaluation of the mediastinum is unremarkable. The trachea is midline. There is no evidence for hilar or mediastinal lymphadenopathy although evaluation is somewhat limited by the lack of intravenous contrast material. There is no axillary lymphadenopathy. Heart size is mildly enlarged. There is no evidence for pericardial effusion. There is interval resolution of left-sided loculated pleural effusion. Small residual layering left-sided effusion is noted. There is no evidence of effusion on the right side. Evaluation of the lung parenchyma demonstrates bullous changes in the bilateral upper lung. 2 mm nonspecific nodular density is noted in the right upper lung, image #18. There is no infiltrate. Atelectatic changes are visualized in the left lower lung. Tracheobronchial tree appears patent. Evaluation of the upper abdomen demonstrates gallstones. Few hypodense lesions are visualized in the hepatic parenchyma, evaluation is limited due to lack of IV contrast.

IMPRESSION: Interval resolution of loculated pleural effusion with residual small layering pleural effusion in the left lung. Cholelithiasis. Few hypodense lesions in the right hepatic parenchyma, evaluation is limited due to lack of IV contrast.

Attending Radiologist: ABBASI, ALMAS

Ordered By: HUSTON, JARED

Order Date: August 10, 2009 10:45 AM

Completion Date: August 10, 2009 9:46 AM

Encounter Number: 010047408439

Accession Number: 3380230

Images were reviewed and interpreted by

Attending Radiologist: Dr. ABBASI, ALMAS

Electronically Signed On: August 12, 2009 4:41 PM by Dr. ABBASI, ALMAS STONY BROOK UNIVERSITY HOSPITAL DEPARTMENT OF RADIOLOGY STONY BROOK, NY 11794-7300
